COLORPLUS® TECHNOLOGY ACCESSORIES

When using James Hardie products with ColorPlus® Technology, ensure long-lasting beauty by exclusively using ColorPlus® Touch-up and Matched Caulk instead of paint and caulk.

COLORPLUS® TOUCH-UP KIT:

Using ColorPlus Touch-Up on ColorPlus products is important to maintain the color consistency and durability delivered through a ColorPlus exterior. ColorPlus Touch-up is specially formulated to match ColorPlus Technology colors and offers better resistance to aging, color change and chalking when used on James Hardie products with ColorPlus Technology.

Edge coater

Edge coating is required for any cuts made in ColorPlus products. Edge coating seals the edges of the board and makes the joints and seams less visible. ColorPlus edge finishes shall be applied with the James Hardie Edge Coater. If any areas larger than a dime require touch-up, replace the area with a new piece of ColorPlus plank or panel.

Touch-up pen

JH Touch-up pens are used for concealing nail heads and very small nicks and scrapes. Touch-up pens shall be used sparingly.

COLORPLUS® TECHNOLOGY MATCHED CAULK:

James Hardie recommends the use of caulks and sealants that remain 'permanently flexible.' Must be applied in accordance with the manufacturer's written instructions.

James Hardie's warranty provides coverage for defects in materials and workmanship on ColorPlus Technology products and ColorPlus Touch-up only. It does not warrant the appearance or performance of any third party coatings or finishes, including paint, used as touch-up and third party touch-up paints used on James Hardie products with ColorPlus Technology.

TRIM ACCESSORIES

Flat Tabs

Reduces nail holes and improves the overall aesthetic of the installation. For trim applications around windows, doors, and band boards.

Corner Tabs

Reduces nail holes and improves the overall aesthetic of the installation. For trim applications on corners.
